Al prodotto viene conferito un aspetto artigianale grazie a irregolarità di bordi, planarità variabile, angoli smussati e superficie strutturata. Quest’ultima, a seconda del colore dello smalto, può assumere in controluce un aspetto più o meno opaco. Lo stesso calibro tra le varie referenze non è sempre garantito. Consigliamo una fuga di 3/4 mm adatta a prodotti naturali. I colori sono riconducibili alla scala cromatica NCS.

A handcrafted look is given to the product through edge irregularities, variable flatness, rounded corners, and textured surface. Depending on the color of the glaze, the surface can take on a more or less opaque appearance against the light. The same caliber between tiles is not always guaranteed. We recommend a joint of 3/4 mm suitable for natural products. Colors are consistent with the NCS color scale.

PIXEL41 CONFIGURATOR

Pixel 41 è una collezione dalle infinite possibilità realizzative, abbiamo sviluppato un simulatore con 20 differenti schemi di posa, volutamente scelti a trama ripetibile per poter dimostrare come può cambiare la resa di un singolo pattern modificandone solo il colore del prodotto e dello stucco. Facilmente accessibile attraverso il nostro sito web, all’interno della collezione Pixel 41, oppure digitando su internet pixel.41zero42.com, si potrà personalizzare il modello selezionato, con conteggio finale automatico del numero di pezzi, scatole, metri quadrati e sfrido necessario a realizzare la propria composizione. Il conteggio sarà della metratura richiesta, avendo inserito precedentemente le dimensioni che si vogliono ottenere, ma l’area massima visualizzabile di posa sarà di 500x500 cm - base x altezza. Inoltre potrai visionare gli ultimi 41 schemi realizzati precedentemente.

Pixel 41 is a collection with an infinite range of possibilities, that’s why we have developed a simulator with 20 different laying patterns, deliberately chosen with repeatable patterns in order to demonstrate how the performance of a single pattern can be changed through the simple modification of the color of the product and the grout. You can easily access it through our website, as part of the Pixel 41 collection, or by typing pixel.41zero42.com on the internet. Thanks to the simulator, you can customize the selected model with an automatic final count of the number of pieces, boxes, square meters, and scrap needed to make your composition. The count will be of the required square footage, having previously entered the dimensions you want to obtain, but the maximum viewable area of laying will be 500x500 cm - base x height. Furthermore, you will be able to see the last 41 schemes previously realized.

NEL CASO DI UN PATTERN CON PIÙ TINTE SI CONSIGLIA DI UTILIZZARE LO STUCCO IN TONO AL COLORE DI FONDO DOMINANTE. IN CASE OF PATTERNS WITH MORE THAN ONE COLOR, IT IS RECOMMENDED TO USE A TONE-ON-TONE GROUT MATCHING THE DOMINANT BACKGROUND COLOR.
