Una gamma di soluzioni ampia e variegata, sempre attuale e potenziata dalla durabilità del prodotto. I bagni Mobilduenne sono incentrati sulla personalizzazione: delle dimensioni prima di tutto, ma anche dei modelli, materiali, elementi, finiture, accessori, attrezzature. Le collezioni si sviluppano intorno ai moduli base adattabili in altezza, larghezza e profondità.

Mobilduenne coniuga il sapere artigianale e l'utilizzo di tecnologie industriali all'avanguardia.

La trasformazione del patrimonio manifatturiero in processi altamente meccanizzati ha portato come risultato a un prodotto su misura che beneficia dei vantaggi e della precisione di una moderna produzione seriale a cui viene riservata l'attenzione ai dettagli tipica del lavoro manuale.

/ Gola J

Le Basi sviluppano la loro ergonomia grazie al sistema di apertura con gola "J". Si tratta infatti di una lavorazione sul pannello che, applicata orizzontalmente alle basi come sistema di presa per ante e frontali, ne agevola l'apertura e la chiusura. La grande praticità di questo sistema è estesa, in verticale, anche ai complementi. Il frontale delle basi con gola "J" è disponibile nella gamma dei laccati lucidi e opachi.

/ EN

The bases develop their ergonomics thanks to the J-shaped opening system which is applied horizontally to the panels at a depth of about 10 mm. It facilitates opening and closing of doors and frontals. This system is also applied vertically to the complements. The front panel of the bases with J-shaped opening is available in the range of shiny and opaque lacquers.
